

SUSTAINABLE HOUSING FOUNDATION

Helping build more sustainable homes in Canada

ALTERNATIVE PATH TO NEAR-ZERO HOUSING

Wed. January 28, 2015 3 PM to 5 PM

Location to be determined. Save the date!

Topic: Using the 'Better Than Code' approach as an alternative path to near zero housing

Who we are: The Sustainable Housing Foundation is a national, non-profit organization whose mandate is to bring together builders, manufacturers of energy efficiency products, energy advisors and raters, municipalities, architects and others in order to educate, train and generally foster the creation of more sustainable homes across Canada.

Why we want you to attend: We have invited Alberta's leading green builders, manufacturers' reps and energy experts to share and learn about an alternative way to achieve near net-zero housing using a "Better Than Code" approach.

The Event: You are invited to participate in a round-table focus group. You will learn. You will share. And, we hope, you will have a great time meeting with your peers from across the province to talk about the issues important to you!

There is no cost to attend but we ask that you please pre-register so we know how many to expect. You can register by sending an email to shfinformation@gmail.com
